June 2, 2022

Dear Jiaming Yuan,

I'm very pleased to let you know that you've received a Ripple Fellowship to support your work focusing on searchable encryption, attribute-based encryption, and blockchain security.

The award funds your tuition, fees, stipend and health insurance for the nine-month academic year 2022-2023. In addition, up to $1500 is available to support travel to present your results at a conference or other research-related expenses. Such conference travel can take place anytime in calendar year 2023.

All recipients of the Ripple Fellowship must submit a brief final report about the project within one year. We look forward to hearing how your work has progressed in that report. Please submit your final report to Jules Jones at julesj@uoregon.edu.

Congratulations on receiving this award and best wishes with your project. Please feel free to email Jules Jones with questions regarding the fellowship.

Sincerely,

Hal Sadofsky
Divisional Dean for Natural Sciences

cc: Reza Rejaie, Department Head, Computer and Information Science
        Yingjiu Li, Ripple Professor, Computer and Information Science
        Daniel Lowd, Director of Graduate Study
        Sarah Larson, Accountant, Computer and Information Science
        Cheri Smith, Graduate Coordinator, Computer and Information Science
        Sarah Bungum, Associate Director Donor and Alumni Relations
